

Accelerate time  
to market with  
VTU Technology and  
Boehringer Ingelheim

Exploit the full potential of *Pichia pastoris*  
for your therapeutic proteins

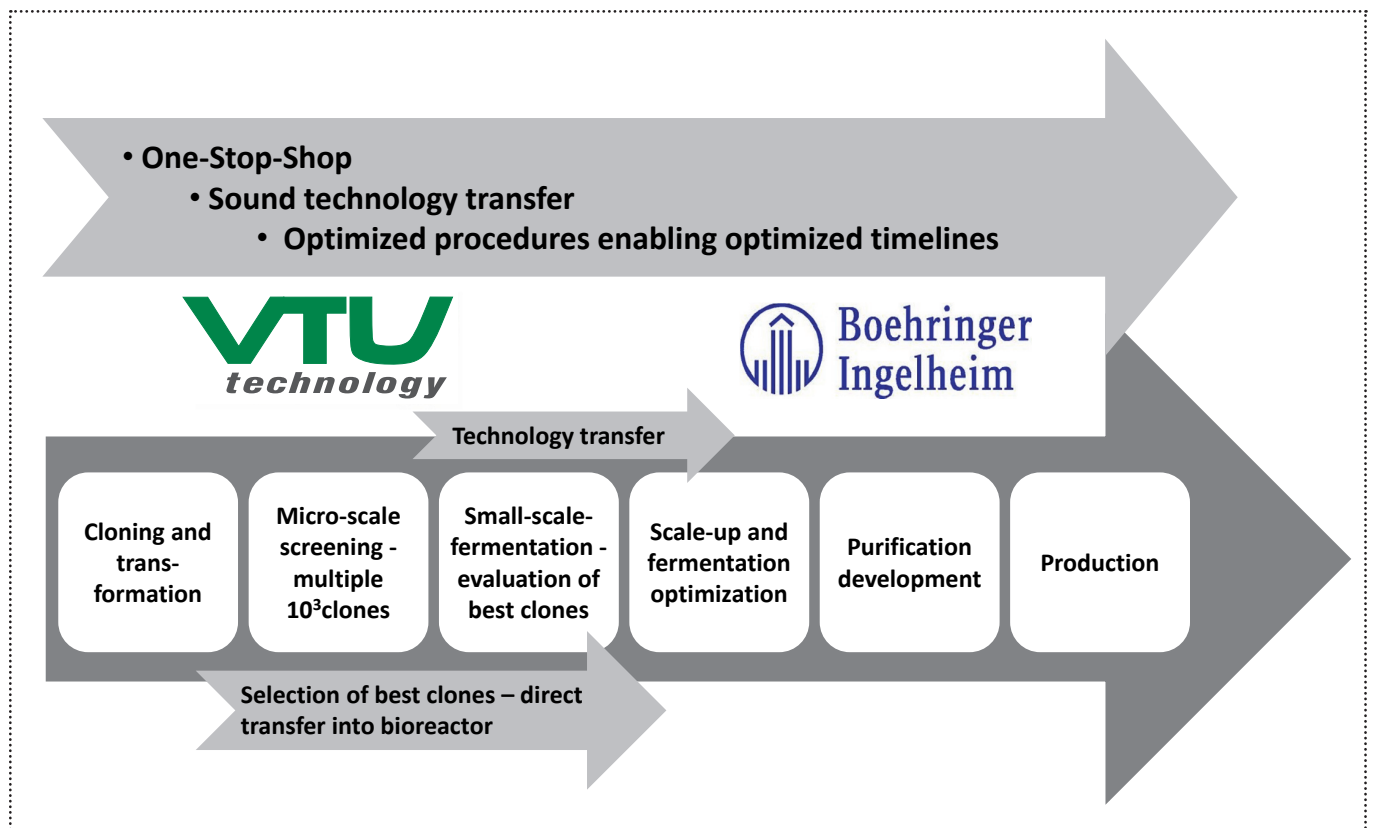

- High-speed expression strain development by VTU & scale-up and GMP manufacturing by Boehringer Ingelheim
- Expression titers of more than 10 g/L
- Purified protein in as little as 12 weeks
- Track record for Fabs and antibody derived fragments, scaffold proteins, enzymes, fusion proteins, cytokines ...
- One-Stop-Shop

# Find your perfect match

VTU Technology and Boehringer Ingelheim offer within their contract manufacturing services industrial *Pichia pastoris* expression strain development and clinical & commercial manufacturing.

The technology platform is characterized by unparalleled speed of development, high yield and quality by applying advanced and exclusive technologies.

All types of services from gene to final drug product will be delivered within this One-Stop-Shop concept .

## Our core competencies in protein expression - your advantage
